REMINGTON SPECIAL FOOTWEAR

The needs of people involved in active sports and outdoor activities are the basis of the development of quality parameters for Remington footwear

Remington Footwear demonstrates the best value for money through the use of innovative technologies and materials. Remington Footwear will make you feel confident and comfortable in the most extreme situations

Remington Footwear are

- Foot protection from frost, moisture and mechanical shock
- Perfect adhesion to various types of surface
- Fixed ankle with good mobility
- High wear resistance
- Light weight & comfort
- Durability for special tasks
- Elastic and safety
- Usability for Hunter, Globetrotter and Defender
- Reasonable price

3M

Thinsulate™ INSULATION

3M Thinsulate™ Insulation is used in Remington products to help keep you warm when it's cold outside. The **unique** microfibers or fine fibers that make up Thinsulate insulation work by trapping air molecules between you and the outside. The more air a material traps in a given space, the better it insulates you from the cold outside air. Because the fibers in Thinsulate insulation are **finer than the fibers used in most other synthetic or natural insulation**, they trap more air in less space, which naturally makes Thinsulate insulation a better insulator. So 3M haven't repealed the laws of nature with our thin insulation; they've simply improved them... to help keep you warm.

REAL TREE DESIGN

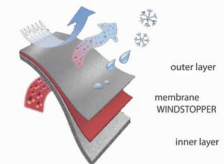

HIGH QUALITY MATERIALS

PrimaLoft material which has high thermal insulation properties. At its inception, the company Albany International very carefully studied the structure of goose down and made the material on its basis. The fibers of the insulation is very thin and look like goose down more than any other fiber synthetic material. This similarity gives the thermal properties of down.

POLARTEC material that provides 100% protection against wind and cold. Durable, quite material is ideal for the production of outerwear and accessories.

WINDSTOPPER laminated fabric provides maximum comfort due to the hyperfine membrane based on polytetrafluoroethylene. 100% breathable and windproof material. Microscopic pockets in the revolutionary material structure provides protection even at extreme temperature.

Remington TACTICAL DRAG BAG RIFLE CASE

ART Nr. GN-9020

SIZE (CM): 120-138 x 40 x 12

CORDURA
FABRIC

Description:

Material: Cordura -style PVC-coated nylon, with reinforced stitching.
Super thick padding to protect your sniper rifles or MGs.
An over flap protects the main zip & nine snap clips with adjustable straps for extra security.
Three external pockets give you plenty of storage for all of your supplies & accessories.
Padding along the top edge is intended to protect turrets, whilst a pocket running along the spine of the bag provides space for a cleaning rod.
Heavy-duty zippers & closed cell foam padding in all pockets.
The full-length padded divider wall allows for secure two-gun storage.
All handles are boxed stitched for greater strength.
The drag bag has a shoulder strap system so you can carry the bag, in the vertical mode like a backpack.

Size External Pockets (CM):

Big Pocket: 30 x 23 x 5 Long Pocket 1: 43 x 12 x 5 Long Pocket 2: 43 x 8 x 5

FUNCTIONAL THERMAL UNDERSHIRT

3 DIFFERENT WEATHER & ACTIVITY VARIATIONS

Remington undershirt is ideal for active sports and manufactured on the basis of VELOFT fibers.

VELOFT - it is 100% natural fiber extracted from eucalyptus wood. VELOFT fibers have a natural softness, elasticity, allow the skin to breathe freely and perfectly removes moisture. VELOFT fibers in combination with polyester fibers to form microscopic air pores in the fabric. These pores create an additional layer of air around the body and provide heat retention. Remington thermal undershirt is thin and comfortable to wear under tight clothes.
